Please find below and/or attached an Office communication concerning this application or proceeding.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extractions of time may be available under the provision of 37°CFR 1.30(e). In the vent, where were, may a reply be time fighted in the provision of 30°CFR 1.30(e). In the vent, where the provision of 30°CFR 1.30(e). In the vent, may reply the time the time adjustment of 30°CFR 1.30(e). In the vent, may reply received by the Office later than three months after the mailing date of this communication. Failure to reply within the set or extended period for reply will by flatted to be came ABANDONED (38 U.S. C.§ 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any counted patter than adjustment. Set 7°CFR 1.70(e). Status 1) Responsive to communication(s) filled on 25 April 2006. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 55-68 la/are pending in the application. 4a) Of the above claim(s) 64-68 is/are withdrawn from consideration. 5) Claim(s) 55-68 la/are application is described to 30°CFR 1.30°CFR			1	Application No.	Applicant(s)

Art Unit: 3673

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 25, 2006 has been entered.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 56-63, drawn to modular building system.

Group II, claim(s) 64 and 65, drawn to a rafter.

Group III, claim(s) 66-68, drawn to a structural joint.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of claim 56 is a roof spanning upright parallel walls with rafters extending in a sloping manner from a ridge beam thereof towards the walls with a cap overlying a rafter and respective roof panel to hold the roof panels in place; while the special technical feature of claim 64 is a rafter having a uniform transverse cross section and having a footprint with corner structures lying at the corners of a perceived rectangle; and, the special technical feature of claim 66 is a relative motion interconnection between interconnection portions of building elements with a shiftable, transitory point of

Application/Control Number: 10/009,369

Art Unit: 3673

load-bearing contact between the portions, with the location of the transitory point depending upon building-structure responses to applied loads.

Newly submitted claims 64-68 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: see above requirement for restriction

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 64-68 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first rafter having intersecting diagonal internal walls, (claim 59), as well as "the roof panels being in slidable contact with the horizontal beam on one of the walls", (claims 61 and 62), must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

Art Unit: 3673

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "108" as well as reference character "118" appear to designate a plurality of different elements of the invention, (reference numeral 108 in Figs. 1, 14, 15, 17). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

With regard to reference numeral 108, Figure 1 and 14 appear to have reference numeral 108 depicting a wall while figure 15 appears to have reference numeral 108 depicting an "edge structure" or "connection" with figure 17 having reference numeral 108 depicting a panel, (roof panel), as well as a beam. To this end, it is noted that the disclosure appears to present Figure 17 as showing two views. However, each figure represented within the drawings shall refer to only one view. And, the brief description of Fig. 17 makes no reference to the cross-section line 17-17 presented in Fig. 20.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 59, 61, and 62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not appear clear and complete as to "each of the roof panels being in slidable contact with the horizontal beam of one of the walls" as now appears in claims 61 and 62. How, for example, does the roof panel slide with respect to the wall?

Further, the specification does not appear to have originally disclosed, "the first rafter has intersecting diagonal internal walls" as now appears in claim 59.

Applicant's arguments within the final full paragraph on page 5 of the response, with respect to claims 61 and 62, do not appear to direct attention to any portion of the specification that would serve to clearly establish a roof panel in slidable contact with the horizontal beam of a wall. The passage alluded to by Applicant merely states, "through an appropriately joined underside elongate element 216, this beam joins with the upper perimeter frame member 204 in panel structure 108."

Claims 56-58, 60, and 63 are allowed.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE**FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/009,369

Art Unit: 3673

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Safavi whose telephone number is (571) 272-7046. The examiner can normally be reached on Mon.-Thur., 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Engle can be reached on (571) 272-6660. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
